

Maintenance Mechanic

We are currently recruiting for a **Maintenance Mechanic**. The ideal candidate will have experience in manufacturing preferably in steel, forging or machining, but no experience is required. This is an excellent opportunity for an entry level industrial maintenance mechanic. Applicants must be organized, self-motivated and able to complete tasks unsupervised. We are hiring for 1st and 3rd shifts.

Knowledge, Skills and Abilities:

- Basic industrial electrical troubleshooting – basic schematics, PLC knowledge, fuse sizing, VOM usage skills.
- Familiar with 120v single phase to 480v 3 phase systems.
- Basic understanding of hydraulics.
- Strong mechanical aptitude – interpret blueprints, read gauges, drill & tap holes, and the ability to use industrial hand tools.
- Cutting torch and welding skills.
- Inspect for defects, misalignment, wear and insufficient lubrication and determine the best process for making repairs with limited interruption to production
- Diagnose and repair activities. Determine materials and replacement parts needed to proceed with repairs, maintenance and rebuilds
- Maintain daily work logs and update equipment records
- Adjust, calibrate, and lubricate machinery and mechanical equipment throughout the facility
- This job involves lifting, pulling prying and ladder work.
- Performs other duties as assigned
- Willing to enroll in formal training

Salary: \$20.00 - \$35.00 hourly, depending on skill

Benefits:

- Medical/Dental/Vision
 - Flexible Spending
 - Group Life
 - Short Term Disability
 - 401K with Company Match
 - Profit Sharing
 - Paid Holidays
 - Vacation
 - Free Uniforms
 - Annual Tool Reimbursement Program
-
